*I am a scientist mainly interested in human behaviour, as well as quantitative methods, and reproducible science.*

## About me

I am an Associate Professor and Researcher at the [Human Behaviour Lab \(LACH\)](#), Faculty of Psychology, at [Universidad El Bosque](#) in Bogotá, Colombia. My research interests include mate choice and human vocal communication, with an aspiration towards understanding musicality. I am also interested in bioacoustics and psychoacoustics, as well as hormonal effects on human behaviour. I published among the first articles showing within-individual changes in voice pitch in response to the social status of the listener, and have demonstrated strong effects of voice modulation on listeners in courtship contexts. I am very passionate about quantitative methods and **R** programming, as a tool to promote reproducibility and open science.

## Primary Research Methods

- Experimental designs
- Online questionnaires
- Voice recording
- Acoustic analysis
- Facial photographs
- Geometric morphometrics
- Anthropometry
- Reproducible Research

## Skills

<b>Programming</b>	R (advanced: all data wrangling, analysis, plots and tables -and even this CV- made in R)
<b>Reproducible Reports</b>	Markdown/Rmarkdown (including <b>L<sup>A</sup>T<sub>E</sub>X</b> and <b>HTML</b> )
<b>Quantitative Research</b>	General and Generalised Models, Linear Mixed-effects Models, Model selection and Averaging, Machine Learning
